

## Your Current Manufacturing Flow

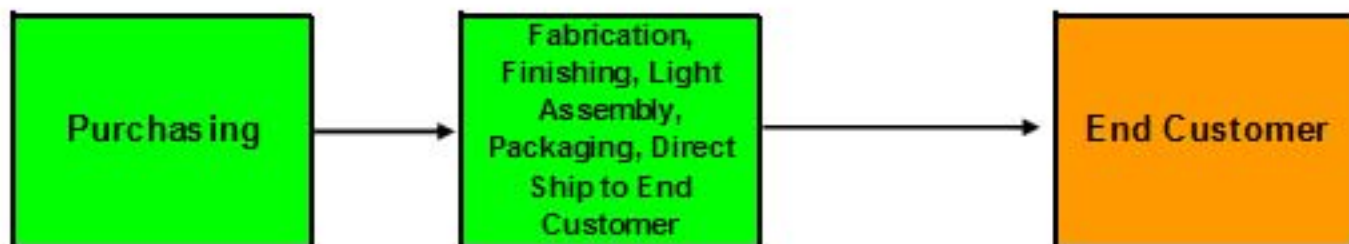

(After all processes are completed, shipped back and forth, and finally accomplished, the product can move on to the customer)

### **Disadvantages to Current Process:**

- Lost time in transit, back and forth to outsources
- Increased potential for damage during handling
- Purchasing is required to issue multiple Purchase Orders and monitor several vendors.
- Excessive freight costs

## Rhinehart's Manufacturing Flow

### **Advantages to Working with Rhinehart's:**

- No lost time in transit, back and forth to multiple sources
- Less handling
- Purchasing is required to issue one Purchase Order and monitor one vendor.
- Reduced freight costs
